

INSTRUCTION FOR USE

LOVI Disposable Brastr Pads

Lovi Disposable Breast Pads can be used during pregnancy while preparing for breastfeeding or during lactation to keep clothes dry. Contoured shape provides the perfect fit. Soft edges assure comfort and discretion. They are formed with four layers, but still thin. Soft inner layer does not irritate breast and helps to keep it dry at all times. Two super absorbent middle layers trap the milk inside, changing it into a gel. Impregnated outer layer holds the gel inside the pad. Adhesive tape helps to keep pads in a correct place. Lovi disposable breast pads let the air coming in and out helping to avoid sore nipples. Each pad is individually foil wrapped to ensure maximum hygiene and convenience at home or while you are out. **Warning!** Change pads regularly, dispose with household waste. **Warning!** This product is not a toy. Keep away from reach of children. Retain the instruction for later use. Batch code on the packaging.
